

RSFGC Horticulture Presents

The Ecology & Behavior of Native Pollinators

The Wisdom Of Bees

Dr. James Nieh

Dr. James C. Nieh was born in Taiwan, but grew up in Southern California. He received his B.A. at Harvard in 1991 and his PhD from Cornell University in 1997. He subsequently received a NSF-NATO Postdoctoral fellowship to study at the University of Würzburg in Germany. After this, he received the prestigious Harvard Junior Fellowship. In 2000, he joined the faculty in the Division of Biological Sciences at the University of California San Diego where he is currently a professor in the Section of Ecology, Behavior, and Evolution. Dr. Nieh's interests focus on bee communication and cognition. He studies many types of social bees, including honey bees, bumble bees, and stingless bees. Currently, his lab is interested in exploring the evolution of bee language, how bees communicate and recruit nestmates to food, and in how pesticides and disease affect bee behavior, navigation, and communication.

QUARTERLY MEETING

**Date: /April 12**

**Time: 5:30 –7:00PM**

**Rancho Santa Fe Garden Club**

**RSVP**

**Ginger Bord**

**760-761-0989**
